## WORK-BASED LEARNING

Learning that works for Michigan!

## WHAT IS WORK-BASED LEARNING?

Work-Based Learning is partnerships with local businesses that assist in educating and training students.

The program provides students with practical experience that allows them to easily see the direct relationship between what is being taught in their classes and the skills and behaviors required to be successful in a particular industry.

- Web Design

## AN ALTERNATIVE APPROACH TO EDUCATION

Students who participate in Work-Based Learning are granted release time during the school day, four days per week. They spend this time in the work-place learning from professionals in a chosen career path.

While partnering with us, employers mentor, teach, and evaluate student performance in an effort to prepare the next generation for success in the work-place.

### HOW DO EMPLOYERS BENEFIT?

Involvement in the program can provide employers with a pool of qualified applicants, reduce the costs of recruitment and training, and enhance the company's involvement in the community.
